

You will have 4 mixtures, each containing 2 different materials and you have to think about how you are going to separate them out into the 2 different materials. Be warned for one of the mixtures you will need to do one method and then a different method. First you have to say which methods you are going to try and then whether the method worked or you had to choose a different method.

Sand and caster sugar What I think I will need to use. What I actually found worked.	Sand and multilink cubes What I think I will need to use.	
Sand and caster sugar What I think I will need to use.		
What I think I will need to use.	What I actually found worked.	
Vhat I think I will need to use.
